## 4. FIRST AID MEASURES

### 4.1 Description of Necessary First Aid Measures

<b>Ingestion:</b>	Do not induce vomiting. Immediately remove product from mouth and wash out mouth with plenty of water. Give two glasses of water to drink and obtain medical attention.
<b>Eye:</b>	Immediately hold the eyes open and flush with fresh running water. Ensure complete irrigation of the eye by keeping the eyelids apart and away from the eye and moving the eyelids by occasionally lifting the upper and lower lids. If irritation develops, obtain medical attention.
<b>Skin:</b>	Wash off skin with soap and water. If irritation develops, obtain medical attention.
<b>Inhalation:</b>	Remove from source of exposure. Monitor symptoms and progress to assess the need for medical attention.

### 4.2 Medical Attention and Special Treatment

<b>First Aid Facilities:</b>	Eye wash station.
<b>Comments:</b>	Treat according to person's condition and specifics of exposure.
<b>Advice to Doctor:</b>	Treat symptomatically.

## 5. FIRE FIGHTING MEASURES

<b>5.1 Suitable Extinguishing Equipment:</b>	On large fires use dry chemical, foam or water spray. On small fires use carbon dioxide (CO <sub>2</sub> ), dry chemical or water spray. Water can be used to cool fire exposed containers.
<b>5.2 Specific Hazards Arising From The Chemical:</b>	On combustion: carbon oxides and traces of incompletely burned carbon compounds, sulphur oxides and nitrogen oxides.
<b>5.3 Special Protective Equipment and Precautions For Fire Fighters:</b>	Determine the need to evacuate or isolate the area according to your local emergency plan. Use water spray to keep fire exposed containers cool. Self-containing breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals.

## 6. ACCIDENTAL RELEASE MEASURES

<b>6.1 Personal Precautions, Protective Equipment and Emergency Procedures:</b>	Determine whether to evacuate or isolate the area according to your local emergency plan. Use full protective equipment and clothing to minimise exposure.
<b>6.2 Environmental Precautions:</b>	Do not allow large quantities to enter drains or surface waters.
<b>6.3 Methods and Materials for Containment and Clean Up:</b>	Observe all personal protective equipment recommendations described in this MSDS. Minor Spills: Scoop up spill and place into a suitable labelled container. Major Spills: Contain spill. Shovel material into clean, dry, suitable labelled containers and close lids tightly. Laws and regulations may apply to releases and disposal of this material. You will need to determine which laws and regulations are applicable.

## 7. HANDLING AND STORAGE

- 7.1 Precautions for Safe Handling:** Use with adequate ventilation. Avoid eye contact and avoid prolonged contact with the skin. Do not take internally. Exercise good industrial hygiene practice. Wash after handling, especially before eating, drinking or smoking.
- 7.2 Conditions for Safe Storage, Including Any Incompatibilities:** Store in a cool, dry, well ventilated area, out of direct sunlight. Avoid sparks, flames and other ignition sources. Store away from incompatible materials, such as oxidising agents.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

- 8.1 National Exposure Standards:** Exposure limits have been set for the following ingredients as listed in the "Exposure Standards for Atmospheric Contaminants in the Occupational Environment [NOHSC: 1003 (1995)]" published by the National Occupational Health and Safety Commission (Australia):

### Ingredients

### Exposure Limits

Formaldehyde  
(CAS No. 50-00-0)

Time Weighted Average (TWA): 1.2 mg/m<sup>3</sup> and 1 ppm.  
Short Term Exposure Limit (SETL): 2.5 mg/m<sup>3</sup> and 2 ppm.  
Carcinogen Category: 2

- 8.2 Biological Limit Values:**

No biological limit allocated.

- 8.3 Engineering Controls:**

Ensure adequate ventilation. Maintain air concentrations below exposure limits.

- 8.4 Personal Protective Equipment:**

### Respiratory

Domestic quantities require no special equipment with normal careful use. When handling bulk quantities. Avoid breathing dusts or vapours. Where ventilation is inadequate and dusts or vapours are generated, respiratory protective equipment should be used suitable for protecting against airborne contaminants. Reference should be made to Australian Standards: AS/NZS 1715 Selection, use and maintenance of respiratory protective devices; and AS/NZS 1716 Respiratory protective devices.

### Eye

Domestic quantities require no special equipment with normal careful use. When handling bulk quantities. Avoid eye contact. Safety glasses with side shields, goggles or face shield should be worn. Eye protection should conform with AS/NZS 1337 Eye protectors for industrial applications.

### Skin

Domestic quantities require no special equipment with normal careful use. Care should be taken with sensitive or damaged skin. When handling bulk quantities. Wear gloves of impervious material. Refer to AS/NZS 2161.1 Occupational protective gloves – Selection use and maintenance.

Wear appropriate clothing, including a chemical resistant apron, where clothing is likely to be contaminated. Industrial clothing should conform to the specifications detailed in AS/NZS 2919: Industrial Clothing.
